

Keynote Speakers

Ken Ortiz, Chicago Regional Manager – The Reuse People of America

Before joining The Reuse People in 2007, Ken had accumulated over 25 years experience in real estate management and development. From single family houses to commercial properties, Ken renovated, restored and created adaptive reuse solutions to old structures. He holds a BA from Southern Illinois University and an MBA from Northwestern University.

Kyle Fitzgerald, Sustainable Construction & Demolition Inc.

Kyle started his career in Iowa City by collecting construction waste material at job sites. In Dubuque, he has been the used material handler at a reuse building material warehouse. He is now serving as the jobsite deconstruction project manager for the Roshek Building.

Durrant Group, Inc. Dubuque

Discussion of the sustainable green aspects of Durrant Group's corporate headquarters located in Dubuque. This will include the redevelopment of the site, construction pollution prevention plan, water use, energy usage, reused and recycled products, salvage material from deconstructed building, and other sustainable aspects of building.

***DMASWA's
Fourth Annual
CDDR
Workshop
May 19, 2009
Dubuque
Grand River
Convention
Center***

Introduction

This workshop is intended to lay the foundation for successful waste reduction for new construction, demolition, deconstruction or renovation projects.

Why prevent waste and recycle?

Around the country there is increasing emphasis on reducing the environmental footprint impact in building renovation and construction. Certification and measurement systems such as your local DMASWA's **Green Vision Buildings** program, the LEED (Leadership in Energy and Environmental Design), green Guidelines for Healthcare, or many other programs are gaining tremendous momentum and attention. Here are a few reasons why:

COST REDUCTION

PUBLIC RELATIONS

“GREEN” CERTIFICATION

TAX DEDUCTION

ENVIRONMENTAL

FOOTPRINT REDUCTION
